

Assignment-14.1

Name: Arjun Manoj

Batch:44

H.No:2303A52134

Task 1 – Portfolio Website Design

Prompt:

Design a modern personal portfolio website for "Arjun Manoj" with the following features:

- Sections: About Me, Projects, and Contact
- A clean and professional UI with a modern color palette (primary blue/purple, dark background, accent green)
- Use responsive design with Flexbox and CSS Grid
- Include a sticky navigation bar with smooth scrolling
- Add hover effects on project cards
- Ensure the website works well on both desktop and mobile devices
- Use simple and readable typography (like Segoe UI or sans-serif fonts)
- Keep the layout minimal, visually appealing, and user-friendly

Code:

Assignment14.1 task1.html > html

```
1  <!DOCTYPE html>
2  <html lang="en">
3  <head>
4  <meta charset="UTF-8">
5  <meta name="viewport" content="width=device-width, initial-scale=1.0">
6  <title>Arjun Manoj Portfolio</title>
7
8  <style>
9  /* Color Palette */
10 :root {
11   --primary: #4f46e5;
12   --secondary: #0f172a;
13   --light: #f1f5f9;
14   --accent: #22c55e;
15 }
16
17 * {
18   margin: 0;
19   padding: 0;
20   box-sizing: border-box;
21   font-family: 'Segoe UI', sans-serif;
22 }
23
24 /* Navbar */
25 nav {
26   display: flex;
27   justify-content: space-between;
28   padding: 15px 50px;
29   background: var(--secondary);
30   color: white;
31   position: sticky;
32   top: 0;
33 }
34
35 nav ul {
36   display: flex;
37   gap: 20px;
38   list-style: none;
39 }
40
41 nav a {
42   color: white;
43   text-decoration: none;
44   font-weight: 500;
45 }
```

<script>
// Smooth Scrolling
document.querySelectorAll('a[href^="#"]').forEach(anchor => {
  anchor.addEventListener('click', function(e) {
    e.preventDefault();

    document.querySelector(this.getAttribute('href')).scrollIntoView({
      behavior: 'smooth'
    });
  });
});
</script>

</body>
</html>
```

Observation:

The AI-generated portfolio website successfully meets all the given requirements.

- The layout is clean and well-structured, with clearly defined sections (About, Projects, Contact).
- The color palette (blue/purple with green accents and dark background) gives a modern and professional look.
- The typography is simple and readable, improving user experience.
- Flexbox and CSS Grid were effectively used to create a responsive layout that adapts well to different screen sizes.
- The navigation bar is sticky, and smooth scrolling enhances usability.
- Hover effects on project cards improve interactivity and visual appeal.
- The design is mobile-friendly, ensuring accessibility across devices.

Overall, the AI helped in quickly generating a functional, responsive, and visually appealing portfolio website, reducing development time and effort.

Task 2 – Online Store Product Page

Prompt:

Design a modern product display page for an online store with the following features:

- Display product image, title, price, and an "Add to Cart" button
- Use BEM (Block Element Modifier) methodology for CSS class naming
- Create a responsive layout using Flexbox or Grid
- Add hover effects on the product card and button
- Show an alert message when "Add to Cart" is clicked
- Use a clean and attractive color palette with good typography
- Ensure the page is mobile-friendly and visually appealing

Code:

```
<> Assignment14.1 task2.html > html
1  <!DOCTYPE html>
2  <html lang="en">
3  <head>
4  <meta charset="UTF-8">
5  <meta name="viewport" content="width=device-width, initial-scale=1.0">
6  <title>Product Page</title>
7
8  <style>
9  /* BEM Block: product */
10 .product {
11     display: flex;
12     justify-content: center;
13     align-items: center;
14     height: 100vh;
15     background: #f3f4f6;
16 }
17
18 /* BEM Element */
19 .product__card {
20     background: white;
21     border-radius: 12px;
22     padding: 20px;
23     max-width: 300px;
24     text-align: center;
25     box-shadow: 0 4px 10px rgba(0,0,0,0.1);
26     transition: 0.3s;
27 }
28
29 .product__card:hover {
30     transform: translateY(-8px);
31 }
32
33 /* Image */
34 .product__image {
35     width: 100%;
36     border-radius: 10px;
37 }
38
39 /* Title */
40 .product__title {
41     font-size: 20px;
42     margin: 15px 0;
43 }
44
45 /* Price */
```

```

signment14.1 task2.html / html
<html lang="en">
<head>
<style>
,

/* Price */
.product__price {
  color: #4f46e5;
  font-size: 18px;
  margin-bottom: 15px;
}

/* Button */
.product__button {
  padding: 10px 20px;
  border: none;
  background: #4f46e5;
  color: white;
  border-radius: 8px;
  cursor: pointer;
  transition: 0.3s;
}

.product__button:hover {
  background: #22c55e;
}

/* Responsive */
@media (max-width: 600px) {
  .product__card {
    width: 90%;
  }
}
</style>

</head>
<body>

<div class="product">
  <div class="product__card">
    
    <h2 class="product__title">Wireless Headphones</h2>
    <p class="product__price">₹1999</p>
    <button class="product__button" onclick="addToCart()">Add to Cart</button>
  </div>
</div>

```

```

</head>
<body>

<div class="product">
  <div class="product__card">
    
    <h2 class="product__title">Wireless Headphones</h2>
    <p class="product__price">₹1999</p>
    <button class="product__button" onclick="addToCart()">Add to Cart</button>
  </div>
</div>

<script>
function addToCart() {
  alert("Product added to cart!");
}
</script>

</body>
</html>

```

Observation:

The AI-generated product page successfully fulfills all the requirements.

- The product card is well-structured using BEM methodology, improving code readability and scalability.
- The layout is responsive, adapting smoothly to mobile and desktop screens.
- The product details (image, title, price, button) are clearly displayed and visually balanced.
- Hover effects enhance interactivity and user experience.
- The “Add to Cart” button triggers an alert, confirming user action.
- The design uses a clean color palette and modern typography, making it visually appealing.

Overall, AI helped create a professional, responsive, and interactive product page quickly and efficiently.

Task 3 – Event Registration Form

Prompt:

Design a professional event registration form for a conference with the following features:

- Fields: Name, Email, Phone Number, and Session Selection (dropdown)
- Add proper labels and ARIA attributes for accessibility
- Implement JavaScript form validation (required fields, valid email, valid phone number)
- Show error messages for invalid inputs
- Use a clean and professional UI with modern colors and typography
- Make the form responsive for mobile and desktop
- Add a submit button with confirmation message on success

Code:

```
Assignment14.1 task3.html > html
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4 <meta charset="UTF-8">
5 <meta name="viewport" content="width=device-width, initial-scale=1.0">
6 <title>Event Registration</title>
7
8 <style>
9 body {
10     font-family: Arial, sans-serif;
11     background: linear-gradient(to right, #4f46e5, #22c55e);
12     display: flex;
13     justify-content: center;
14     align-items: center;
15     height: 100vh;
16 }
17
18 /* Form Container */
19 .form-container {
20     background: white;
21     padding: 30px;
22     border-radius: 12px;
23     width: 350px;
24     box-shadow: 0 5px 15px rgba(0,0,0,0.2);
25 }
26
27 /* Heading */
28 h2 {
29     text-align: center;
30     margin-bottom: 20px;
31 }
32
33 /* Input Groups */
34 .form-group {
35     margin-bottom: 15px;
36 }
37
38 label {
39     display: block;
40     margin-bottom: 5px;
41     font-weight: bold;
42 }
43
44 /* Inputs */
45 input, select {
```

```

<html lang="en">
<head>
<style>
/* Button */
button {
  width: 100%;
  padding: 10px;
  border: none;
  background: #4f46e5;
  color: white;
  border-radius: 8px;
  cursor: pointer;
}

button:hover {
  background: #22c55e;
}

/* Responsive */
@media (max-width: 500px) {
  .form-container {
    width: 90%;
  }
}
</style>

</head>
<body>

<div class="form-container">
  <h2>Conference Registration</h2>

  <form id="regForm" aria-labelledby="formTitle">

    <div class="form-group">
      <label for="name">Full Name</label>
      <input type="text" id="name" aria-required="true">
      <span class="error" id="nameError"></span>
    </div>

    <div class="form-group">
      <label for="email">Email Address</label>
      <input type="text" id="email" aria-required="true">
      <span class="error" id="emailError"></span>
    </div>
  </form>
</div>

```

```

<body>
<div class="form-container">
  <form id="regForm" aria-labelledby="formTitle">
    <div class="form-group">
      <span class="error" id="emailError"></span>
    </div>

    <div class="form-group">
      <label for="phone">Phone Number</label>
      <input type="text" id="phone" aria-required="true">
      <span class="error" id="phoneError"></span>
    </div>

    <div class="form-group">
      <label for="session">Select Session</label>
      <select id="session" aria-required="true">
        <option value="">-- Choose Session --</option>
        <option>AI & Machine Learning</option>
        <option>Web Development</option>
        <option>Cyber Security</option>
      </select>
      <span class="error" id="sessionError"></span>
    </div>

    <button type="submit">Register</button>
  </form>
</div>

<script>
document.getElementById("regForm").addEventListener("submit", function(e) {
  e.preventDefault();

  let isValid = true;

  // Get values
  let name = document.getElementById("name").value.trim();
  let email = document.getElementById("email").value.trim();
  let phone = document.getElementById("phone").value.trim();
  let session = document.getElementById("session").value;

  // Clear errors
  document.querySelectorAll(".error").forEach(el => el.textContent = "");

```

```

// Name validation
if (name === "") {
    document.getElementById("nameError").textContent = "Name is required";
    isValid = false;
}

// Email validation
let emailPattern = /^[^ ]+@[^.]{2,3}$/;
if (!email.match(emailPattern)) {
    document.getElementById("emailError").textContent = "Enter valid email";
    isValid = false;
}

// Phone validation (10 digits)
let phonePattern = /^[0-9]{10}$/;
if (!phone.match(phonePattern)) {
    document.getElementById("phoneError").textContent = "Enter valid 10-digit phone";
    isValid = false;
}

// Session validation
if (session === "") {
    document.getElementById("sessionError").textContent = "Select a session";
    isValid = false;
}

// Success
if (isValid) {
    alert("Registration Successful!");
    document.getElementById("regForm").reset();
}
});
</script>

</body>
</html>

```

Observation:

The AI-generated event registration form meets all the specified requirements.

- The form includes all required fields: name, email, phone number, and session selection.
- Form validation using JavaScript ensures correct input and prevents invalid submissions.

- Error messages are displayed clearly, improving usability.
- The form uses labels and ARIA attributes, making it accessible for assistive technologies.
- The UI design is clean and professional, with a structured layout and modern color palette.
- The form is fully responsive, adapting well to different screen sizes.

Overall, AI helped create a user-friendly, accessible, and validated form efficiently, reducing manual effort.

Task 4 – Resume Website

Prompt:

Design a one-page professional resume website with the following features:

- Sections: Profile Summary, Skills, Education, and Experience
- Use modern and professional typography (clean sans-serif fonts)
- Align all sections using CSS Grid for structured layout
- Add a fixed navigation bar with smooth scrolling between sections
- Ensure the design is responsive for mobile and desktop
- Use a minimal and elegant color palette
- Add hover effects where appropriate

Code:

```
Assignment14.1 task4.html > html
1  <!DOCTYPE html>
2  <html lang="en">
3  <head>
4  <meta charset="UTF-8">
5  <meta name="viewport" content="width=device-width, initial-scale=1.0">
6  <title>Resume - Arjun Manoj</title>
7
8  <style>
9  :root {
10     --primary: #4f46e5;
11     --dark: #0f172a;
12     --light: #f8fafc;
13  }
14
15  * {
16     margin: 0;
17     padding: 0;
18     box-sizing: border-box;
19     font-family: 'Segoe UI', Arial, sans-serif;
20  }
21
22  /* Navbar */
23  nav {
24     position: fixed;
25     width: 100%;
26     background: var(--dark);
27     color: white;
28     display: flex;
29     justify-content: space-around;
30     padding: 15px;
31     top: 0;
32  }
33
34  nav a {

Profile	Skills	Education	Experience
Profile Summary Name: Arjun Manoj Passionate developer interested in AI, web development, and solving real-world problems.			
Skills HTML CSS JavaScript Python Machine Learning			
Education B.Tech in Computer Science XYZ University (2022–2026)			
Experience Intern - Web Development Worked on building responsive web applications.			

Observation:

The AI-generated resume website effectively satisfies all the requirements.

- The layout is well-organized with clear sections: Profile Summary, Skills, Education, and Experience.
- CSS Grid is used efficiently, ensuring proper alignment and spacing of content.
- The typography is modern and professional, improving readability and visual appeal.

- The navigation bar enables smooth scrolling, enhancing user experience.
- The design is responsive, working well across devices.
- A minimal color palette keeps the interface clean and elegant.

Overall, AI helped create a structured, professional, and responsive resume website quickly and efficiently.

Task 5 – Restaurant Menu Page

Prompt:

Design a modern digital restaurant menu page with the following features:

- Display menu items with name, description, and price
- Use a food-friendly color palette (warm tones like orange, red, cream)
- Create a responsive card-based layout using CSS Grid or Flexbox
- Add hover effects on menu items for better interactivity
- Use clean and readable typography
- Ensure the design is visually appealing and mobile-friendly

Code:

```

> Assignment14.1 task5.html > ...
1  <!DOCTYPE html>
2  <html lang="en">
3  <head>
4  <meta charset="UTF-8">
5  <meta name="viewport" content="width=device-width, initial-scale=1.0">
6  <title>Restaurant Menu</title>
7
8  <style>
9  :root {
10     --primary: #ff6b35; /* orange */
11     --secondary: #2f2f2f; /* dark */
12     --light: #fff8f0; /* cream */
13  }
14
15  * {
16     margin: 0;
17     padding: 0;
18     box-sizing: border-box;
19     font-family: 'Segoe UI', sans-serif;
20  }
21
22  body {
23     background: var(--light);
24  }
25
26  /* Header */
27  header {
28     text-align: center;
29     padding: 20px;
30     background: var(--primary);
31     color: white;
32  }
33
34  /* Grid Layout */
35  .menu {

Observation:

The AI-generated restaurant menu page successfully meets all requirements.

- The menu items are clearly displayed with name, description, and price.
- The color palette uses warm food-friendly tones, enhancing visual appeal.
- A card-based layout with CSS Grid ensures proper alignment and responsiveness.
- Hover effects on menu cards improve interactivity and user experience.
- The design is clean, modern, and mobile-friendly, making it easy to navigate.

Overall, AI helped create a visually appealing and responsive restaurant menu page quickly and efficiently.
